

JHARKHAND COUNCIL OF EDUCATIONAL RESEARCH AND TRAINING, RANCHI
ANNUAL EXAM
2023-24
CLASS – XI
ENGLISH CORE
MODEL QUESTION PAPER

Time:1 hrs

Marks-40

GENERAL INSTRUCTIONS:

Total number of questions is 40.
Each question carries 1 mark.
Four options are given.
Students are expected to select the most appropriate answer.
All the questions are compulsory.
No marks will be deducted for wrong answer.

MULTIPLE CHOICE QUESTIONS

Read the passage given below and answer the questions from 1-5.

The concept of renewable energy has gained significant attention in the recent years as a way to reduce our dependence on fossil fuels and combat climate change. Solar, Wind, hydroelectric, geothermal and biomass are examples of renewable energy sources. These sources are considered renewable because they can replenish naturally, unlike fossil fuels, which take millions of years to form and are finite.

One of the main advantages of renewable energy is that it is environment friendly. Renewable energy sources do not produce greenhouse gases, which contribute to positive climate change. They also do not produce harmful air pollutants like Sulphur dioxide and nitrogen oxides.

Another advantage of renewable energy is that it can provide reliable and stable source of energy. For example, hydroelectric plants can operate for long period of time without interaction and solar panels can generate electricity even on cloudy days. Also, renewable energy sources are becoming more affordable as technology improves and economies of scales are achieved.

1. Solar, Wind, hydroelectric, geothermal and biomass are examples of _____ Sources.
 - a. Renewable energy
 - b. Fossil Fuels
 - c. Non-Renewable energy
 - d. None of these
2. What take millions of years to form and are finite?
 - a. Renewable energy sources
 - b. Fossil Fuels
 - c. Non-Renewable energy sources
 - d. None of these

3. Which of the following is/are harmful air pollutant?
- Oxygen
 - Nitrogen
 - Hydrogen oxide
 - Sulphur dioxide
4. What is one of the greatest advantages of renewable energy sources?
- That it leads to climate change
 - It leads to the depletion of various resources
 - It is environment friendly
 - None of the above
5. Which of the following mean the same as 'generate' from the passage?
- Recreate
 - Produce
 - Restore
 - Capture
6. Abbreviations are freely used in _____.
- Notice writing
 - Letter writing
 - Note-making
 - Article writing
